

Hello Virologists :-)

This collection contains most of the Virus sounds I ever made, in SoundDiver library format and as standard MIDI files. The "Extras" files contain a few programs that make use of later OS features, so please make sure you are running the latest OS for your Virus model.

Disclaimer: Load these sounds at your own risk!

Note: A lot of these sounds make use of left-hand controllers and aftertouch.

HS Virus A - Extras, 88 sounds

-----

The same as "HS88" which has been available for years. Will work on any Virus model, but you may find better versions in the "HS Virus B - Extras" library.

HS Virus B - Bank F, 128 sounds

-----

Bank F just in case you used STORE TO FLASH to overwrite it.

HS Virus B - Extras, 144 sounds

-----

Various sounds optimized for Virus B series (OS 4.9).

HS Virus C - Bank D, 128 sounds

-----

Same as Virus B bank F, but some sounds may have been optimized for Virus C.

HS Virus C - Extras, 140 sounds

-----

Various sounds optimized for Virus C series (OS 6.5). Some of these sounds use the Moog ("Analog") filter models.
